Grades

Form	Grades (%)	Notes
Lab	70	Twelve labs in total. The students can exclude any two and submit ten. Ten highest scores will be considered in the final grade if one completed more than ten labs.
Proposal	10	**Every student** is encouraged to select an area of interest to research on natural phenomena, to search for and download relevant remote sensing and environmental datasets, and to make a proposal on how to better understand the natural process. *PPT presentation accounts for 5%. Every student is asked to make comments/suggestions on others' work. This will be counted for 5% in terms of class participation. Anonymous reviews will be sent to the presenter after the class.*
Final project	20	**Every student** is encouraged to use **GIS tools and coding** for spatial and temporal analyses, and to finalize a report and an enlightening figure. *PPT presentation 5% | Q&A 5% | Difficulty 5% | Report and enlightening figure 5%*

⚠️**ATTENTION PLEASE**⚠️

- Please read *Before the Class* and complete the tasks (software installation, testing, account registration, data download, literature reading, etc.) prior to the class
